Ticking memories

Begründungen

0
The paragraph is about a passionate watch collector who became interested in watches when he was an adolescent. The text says: “Wellington watch collector Conrad Smith is more aware of them than most. In his youth, he became enchanted with the small, mechanical objects, graceful in form and movement, that measure increments of time with remarkable precision.”

1
The paragraph describes that Conrad Smith likes watches worn by people he looks up to. The text says: “The watches that attracted him then — and now — were worn by people he admired: Ian Fleming, David Attenborough and Sir Edmund Hillary among them.”

2
The paragraph gives an example of a Rolex watch that a famous climber wore and describes what the watch stands for. The text says: “On the Everest climb, Hillary took a Rolex Oyster Perpetual on which Rolex based its famous Explorer. ‘The Explorer became the watch that defined what it was to be an adventurer and to discover new things and to reach new heights.’”

3
The paragraph describes that an object can remind you of specific situations. The text says: “‘You surround yourself with things you identify with that are important to you. Sometimes, objects hold memories or become tokens you can look back to and say, ‘That reminds me of a time when a particular thing happened.’”

4
The paragraph describes the memories Conrad Smith associates with the Rolex Explorer, one of his watches. The text says: “He points to the Rolex Explorer he’s wearing. ‘I’d been on a waiting list for this for months. Finally, I got the call. I drove into the city and collected it. Kat was pregnant at the time, and the very next day, Olive arrived. This watch is a reminder of that moment and connects me to that memory.’”

5
The paragraph is about the abstract concept of time. The text says: “Watches weave together art, science and technology. Then, there is understanding time itself. What is it, and how does it work? ‘There’s something poetic and ethereal at work.’ Time is outside the perception of the senses. It can’t be seen, tasted or touched. But it’s there. It impacts everyone.”

Textquelle: Ryn, Chris van: Why this Wellington man collects wonderful watches.
https://thisnzlife.co.nz/why-this-wellington-man-collects-wonderful-watches/ [21.10.2025] (adaptiert).

6
The paragraph describes how time can literally be seen in a watch. The text says: “Watches harness a kind of magic pulse. A watch makes visible something that is invisible. The wind isn’t detectable, but leaves of trees move. In a watch, time can be seen ‘moving’ the second hand.”

7
The paragraph is about the concept of time, what it is based on and how it is organized. The text says: “‘How did we decide to break it down into a 24-hour day, which we then display on a watch face?’ Time is based on a solar cycle unique to Earth. And it changes all the time. Whenever an earthquake happens, the rotation of the earth varies by a fraction of a second.”

8
The paragraph describes how watches help people structure their everyday life. The text says: “It can be difficult to make sense of things day to day. ‘But certain patterns, rhythms and cycles give some structure. They help us make sense of the world. I feel like watches capture that structure.’”

9
The paragraph is about the individual perception of time that varies from person to person. The text says: “There’s a scientific rigour about measuring and keeping track of time. But the reality, says Conrad, is that everyone perceives time differently. ‘My first 10 years of life took forever. The past 10 years — they just disappeared.’”

Beavers returning

0	1	2	3	4	5	6	7
A	D	B	B	C	D	B	C

Begründungen

0
The text says: "No trees to offer welcome shade, the only vegetation being dry scrub that clings to the flat, dusty plains, while the sheer cliffsides are barren of life. But if you happen to glance down at the dizzying depths of the canyon that lies at the bottom of the desert sandstone mountains, you'd see a lush oasis, blooming with green vegetation, the Price River snaking through the rock even on the hottest of summer days." The Price River Valley therefore provides a contrast to the surrounding landscape.

1
The text says: "And if you scrambled down, and watched patiently for long enough, you might even spot some beavers – the very architects of this thriving wetland landscape, smack bang in the middle of the desert." The beavers down in Price Valley have therefore shaped the surroundings.

2
The text says: "Doden and several other researchers set out to reintroduce beavers to the drought- and fire-stricken land. Water shortages are severe here, and much of the river ecosystem is degraded. Doden's primary goal is to restore the quantity and quality of water in eastern Utah, whose waterways sustain an array of wildlife, riverbank vegetation and endangered fish species." Doden and her colleagues therefore mainly aim to improve the water situation with the help of beavers.

3
The text says: "Water shortages in the region have been made worse by river degradation, caused by irrigation, pollution and mismanagement." Water in the territory has therefore become increasingly low because water resources were handled badly.

4
The text says: "Beavers used to be a prevalent species worldwide, ranging from Scotland to Spain, Syria to Russia, Canada to Mexico. The fur trade of the 1500s to 1800s saw the creatures hunted to almost extinction, […]." For hundreds of years, beaver populations therefore had to fight for their survival.

5
The text says: "These changes in the watershed contribute to a number of improvements in the environment, including better stream quality, leading to healthier fish populations; carbon capture via the shallow ponds which hold back silt and sequester the gas; increasing resistance against wildfires; and providing a habitat for other animals." Due to beavers' activities, natural habitats therefore gain in quality.

6
The text says: "All this contributes to their status as a 'keystone' species, essentially defined as an animal that multiple other species rely on within an ecosystem." Beavers today therefore hold a special position because they play a vital role for the local wildlife.

7
The text says: "For Doden, relocating beavers into the desert posed some unique challenges. The availability of water being the obvious one. The drought was so bad last year that one of Doden's study sites completely dried up. 'And the intense heat,' she adds. 'In the summertime it can be above 100F (37.8C) for weeks or even months at a time. And so we initially tried to avoid relocating animals during the hottest months.'" At the beginning of the project, Doden therefore arranged a seasonal schedule.

Begründungen

0
The text says: "The pomp of EC Comics was brief - lasting less than a decade - and its legacy, while immense and profound, is also diffuse and, crucially, unbranded." EC's success was therefore short-lived.

1
The text says: "'The History of EC Comics' divides its account into three distinct eras that span the lives of two men: founder Maxwell Gaines, and his son, William." The new book about EC therefore does not devote a section to each of the figures leading the company.

2
The text says: "Like many American Jews making their way in the world - without whom there would be no comic-book industry, nor a Hollywood to make films out of its characters - he had felt it necessary to anglicise his name (his parents went by Ginsberg)." The founder of EC therefore thought he should appear more American.

3
The text says: "What linked them, other than blood, is that each initially had no interest in comics as a form, yet grew to cherish it, then transfigure it." Both father and son were therefore not fascinated by the opportunities cartoons offered from the very start.

4
The text says: "Max would go on to co-found, then part ways with, All-American Comics, the forerunner to DC." The founder of EC therefore did not singlehandedly establish a second publishing house.

5
The text says: "Following wartime military service he had planned to become a chemistry teacher, yet he found his feet with remarkable speed." It therefore did not take the son any time to match his father's business skills though he had wanted to become an educator.

6
The text says: "These more than lived up to their billing: they were a vivid and thrilling panoply of horror, science fiction and war titles that would help define the visual and storytelling language of American pop culture." The new EC genres therefore influenced the following generations' artistic forms of expressions.

7

The text says: “Although closely involved in the construction of storylines, his genius did not lie on the creative side.” The founder’s son therefore was not a gifted artist.

8

The text says: “Each was assigned to the genre they best suited.” The artists therefore could not choose which type of comic they wanted to create.

The mad business of bottled water

0	1	2	3	4	5	6	7	8
A	D	B	C	A	D	B	C	A

Begründungen

0
The text says: "Last year, the Merchant hotel in Belfast launched its water menu to a global chorus of tabloid mockery." A hotel in the capital of Northern Ireland was therefore made fun of in the press.

1
The text says: "When I visited this summer to sample the menu, he still seemed a little puzzled by the reaction." When Sophie went to the hotel, she therefore wanted to try their selection of waters.

2
The text says: "The Merchant's executive chef, and the chief architect of the water menu, Patrick Leonard – a man so passionate about water that before every sip I took, I could sense him shuffling to the edge of his seat in anticipation […]." Patrick Leonard was therefore excited to see what Sophie's reaction would be.

3
The text says: "[…] brought out the notorious £26 bottle, called Iceberg. […] 'They're not allowed to remove parts of icebergs,' said Leonard, 'so they have to wait until they separate. They detach naturally, and then they're netted, brought on a boat to land and allowed to melt.' […] Leonard poured a portion of the ancient iceberg into a tumbler. […] I sipped, swallowed, felt the passage of liquid down my oesophagus […]." The water Sophie first had was therefore made from ice that breaks off glaciers and falls into the sea.

4
The text says: "I was painfully aware that the glass of water in front of me was worth a tenner, and I still had my bottle of airport-purchased Boots' own brand on the table." Sophie was therefore embarrassed because she had brought along a cheap bottle of water.

5
The text says: "I sipped, swallowed, felt the passage of liquid down my oesophagus – and couldn't taste anything at all. This was not a total failure of my unsophisticated palate. Melted iceberg essentially has no taste […]." When tasting the first type of water, Sophie therefore found that it lacked flavour.

6
The text says: "We moved on to Whitehole Springs, a Somerset-sourced, calcium-rich still water that passes through Tufa rock; Vichy Catalan, a salty Spanish sparkler; and finally De L'Aubier Sap Water, from Canada, a byproduct of the maple syrup manufacturing process." Sophie therefore learned that another type of water is related to a different product.

7
The text says: "Along the way, Leonard explained the origin of his water preoccupation: a radio interview he heard with – who else? – Martin Riese: 'It just got me hooked; that was it.'" Patrick Leonard therefore says that his passion was sparked by something he listened to.

8
The text says: "And, I'll admit it, tasting this quartet of waters taught its own lesson. Pay attention, as with anything, and you notice more, appreciate more." What Sophie therefore learned from the water tasting was that it has something in common with other experiences in life.

Textquelle: Elmhirst, Sophie: Liquid assets: how the business of bottled water went mad. https://www.theguardian.com/business/2016/oct/06/liquid-assets-how--business-bottled-water-went-mad [21.10.2025] (adaptiert).

Techno in Berlin

0	1	2	3	4	5	6	7	8
A	C	D	B	B	A	D	B	C

Begründungen

0
The text says: “Decades before, the Nazis had seized property from Jewish citizens, and after the war, the communists took away real estate from who they perceived as Nazis or the bourgeois class.” Following the Second World War, the political party in power therefore forced some people to part with what they owned.

1
The text says: “And while this chaos over ownership was a headache for the state and, of course, for the descendants of the people whose property had been seized, it was a godsend for the newly emerging techno scene.” The fact that Berlin’s real estate market was so disorganized was therefore a blessing for a certain community.

2
The text says: “The parties were always changing locations and Berlin’s underground techno scene might have eventually faded away were it not for a guy named Dimitri Hegemann.” The initial club gatherings were therefore at risk of disappearing altogether.

3
The text says: “But now that the Wall had come down, and the techno scene was expanding, he wanted something bigger.” When the political situation in Berlin changed, Hegemann was therefore keen on increasing his business.

4
The text says: “One day, in 1990, Hegemann was stuck in a traffic jam with two friends right by the former Wall when they noticed a large concrete building that was at one point a department store. They ventured down into the building and found an enormous vault which they were able to rent on a three-month lease.”
Finding a promising site, Hegemann therefore managed to get temporary use of it.

5
The text says: “Tresor quickly became known for its hard Detroit-inspired techno parties that would go all weekend. With the fog machines and strobe lights and loud beats, people seemed to forget time and space.” The newly founded club therefore offered an intense experience for clubbers.

6
The text says: “Tresor didn’t just help popularize this new harder Detroit techno sound, it also helped build a real connection between the Berlin and Detroit techno scenes.” The club therefore became well-known and linked two musical communities.

7
The text says: “And meanwhile, a whole network of clubs began to develop nearby, in the empty buildings right by the former site of the Berlin Wall. Over time, the techno scene began driving an economic revival in Berlin.” As time went by, Berlin’s techno community therefore helped to make the city flourish again.

Textquelle: Autor/in nicht genannt: Tanz Tanz Revolution.
https://99percentinvisible.org/episode/tanz-tanz-revolution/ [04.11.2024] (adaptiert).

8

The text says: “People began opening not only clubs, but bars and art galleries and all kinds of small businesses, and all these new businesses could basically fly under the radar. There was so much else going on with the politics of reunifying the city, that for the most part, no one was really checking to make sure anyone was paying taxes or acquiring the proper permits to put on events or serve alcohol, which was the case for years.” A number of newly established places in Berlin therefore attracted hardly any notice.

Begründungen

0
The text says: "How long had the Council been promising to get that pavement repaired?" Alf was therefore not wondering why so much time had been spent on fixing the sidewalk.

1
The text says: "It took him longer now, and he needed his stick." These days, Alf therefore relied on a walking aid to be able to run his errands.

2
The text says: "The appearance of curtains had been a thing of great importance to Joan. Indeed, she had often judged people's characters by the hang of their curtains and the shine of their ornaments." Joan had therefore based her view of others on how neat they kept their interior decoration.

3
The text says: "Alf had spotted her one day in the window of the charity shop next door to McKay's and with Joan in mind had gone in to enquire about the price." Alf had therefore not carefully planned to purchase the porcelain figure.

4
The text says: "It was in immaculate condition and the name on the bottom was one Alf recognised from Joan's collection." The porcelain figure had therefore been as good as new when Alf purchased it.

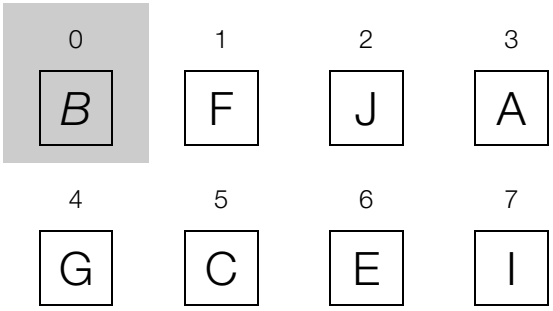

5
The text says: "A sudden jangle made Alf start and the ballerina swooped from his grasp." Alf therefore did not lose his grip of the porcelain figure due to its polished surface.

6
The text says: "Leaving the ballerina reclining like an angel on a cloud, Alf made for the door, forcing his protesting knees to get him there before the caller, whoever it was, got tired of waiting." Alf was therefore quite anxious about his visitor being impatient.

7
The text says: "Just passing and happened to notice the little ballerina wasn't in her usual place so I knew you must be about your housework." Cathy was therefore familiar with Alf's daily routine.

Korrekturhinweise

Flight shame

Begründungen

0
The paragraph is about the last time the author decided to take a plane to get somewhere. The text says: “Getting to my sister’s hen party in Scotland by train, my usual option, would have taken days that I didn’t have, so then too I bit the bullet and took a flight.”

1
The paragraph is about the author’s view that flying is environmentally harmful and therefore wants to reduce flying as much as possible. The text says: “Eventually this led me to vow only to do it if absolutely necessary.”

2
The paragraph is about the movement asking people to give up air travel for the sake of the environment. The text says: “The term speaks of the guilt of taking flights at a time when the world needs to dramatically cut greenhouse gas emissions.”

3
The paragraph is about the possibility of going by train as an alternative to flying, which is attracting the attention of politicians. The text says: “This growing resistance to aviation has reinvigorated rail travel, with some rediscovering the attraction of night trains, and it is increasing pressure on politicians to address aviation’s climate impact. But it is also changing our ideas of how, why and where we travel.”

4
The paragraph explains that the term does not seek to criticize others for flying but aims to challenge one’s own travel habits. The text says: “Importantly, it is less about “shaming” other people who fly than changing your own travel patterns.”

5
The paragraph is about the fact that avoiding going by plane does not mean not travelling, as there are other options. The text says: ‘“There are so many places that we can access by other means.’”

6
The sentence is about the disadvantages of flying. The text says: “It’s easy to forget that a plane is not always the fastest or cheapest option, as train travel typically brings you from the centre of one city to another.”

Textquelle: Timperley, Jocelyn: Why ‘flight shame’ is making people swap planes for trains. http://www.bbc.com/future/story/20190909-why-flight-shame-is-making-people-swap-planes-for-trains [04.11.2024] (adaptiert).

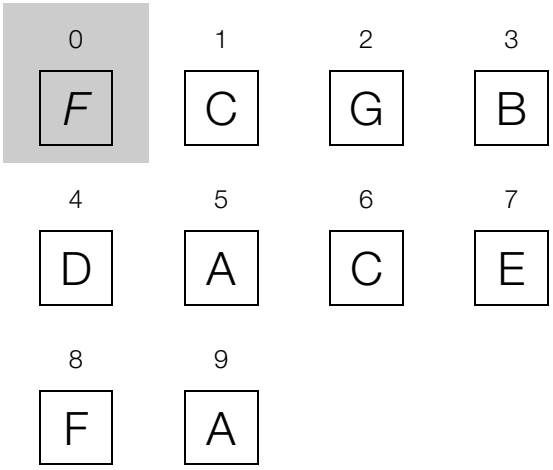

7

The paragraph is about the advantages of choosing other means of transport. The text says: “And even if it does take more time, other forms of transport can be more rewarding. Like Hughes, I have experienced the joys of slow travel in my five earthbound years, from late-night conversations with a couple of Iranian travellers on an overnight train to Verona, to sipping a whisky in the bar of the Caledonian sleeper to Edinburgh.”

European metro stations worth seeing

Begründungen

0
The text says: “It’s a grand multi-storey building housing both a platform underground and additional platforms and stores above.” The metro in Athens therefore has various floors above and below ground.

1
The text says: “It has been around since 1863, and the way in which platforms for different lines are weaved into a network of tunnels under the city is awe-inspiring. By simply walking from one set of platforms to another, you seamlessly change from the likes of the District Line to the Circle Line to the Bakerloo Line.” The London Underground therefore impresses passengers through the complex linking of its tracks and stations.

2
The text says: “São Bento Railway Station is a 19th-century train station known for the some 20,000 ***azulejo*** tiles that decorate its interior. The tiles are elaborate in their depiction of great battles and pastoral scenes.” The metro in Porto therefore has art portraying historical scenes.

3
The text says: “Along the platforms, red skies engulf trees, buildings and animals, representing the threat to Sweden’s natural environment posed by pollution, industry and modern life.” The metro in Stockholm therefore uses art to address current issues.

4
The text says: “Abbesses station is also beautiful underground, boasting multiple colourful murals of poppies, city scenes, groupings of Parisians, and fantastical beasts.” The metro in Paris therefore shows real-life as well as imaginary motifs in its wall art.

5
The text says: “Construction on the Naples Metro (Metropolitana di Napoli) started in 1911, with lines and platforms added either side of the two World Wars. Extensions are refurbishments have never really stopped – like many metro systems around the world, Napoli’s is a perpetual work in progress.” The metro in Naples therefore has been steadily increasing in size and design over the last 100 years.

Textquelle: Lush, Emily: 30 of the most beautiful metro stations around the world. https://wander-lush.org/beautiful-metro-stations/ [04.11.2024] (adaptiert).

6
The text says: “Many of the older stations are the most interesting ones to visit, simply because of the artwork depicting the station names on the platforms.” The London Underground therefore uses art to indicate where passengers are.

7
The text says: “Located right in the centre of Malmö, Sweden, what makes it unique is its striking shape. As you walk into the station, it’s like walking into a huge spaceship! It’s an amazing piece of architecture. Just as interesting as it looks from below, the best views are from above. Because it’s all made of glass, by day, you can see the people inside the station. It looks even better by night.” The metro in Malmö is therefore impressive through the use of form and material.

8
The text says: “Many archaeological finds have been incorporated into the design of the station, encased in glass to protect them from passing commuters.” The metro in Athens therefore has integrated historical discoveries into its architecture.

9
The text says: “One of the more recent developments was to introduce ‘Stations of Art’, a bold plan to entrust the design and layout of new metro stations to different contemporary artists and architects. More than 180 artworks by 90 Italian and international artists now decorate stations along metro lines 1 and 6.” The metro in Naples therefore has employed professionals to make stations more appealing.

The down jacket

0	1	2	3	4	5	6	7
D	B	B	C	A	D	D	C

Begründungen

0
The text says: "George Finch, his fellow explorer, was an outsider, a moustachioed Australian with chiselled good looks and an independent streak who liked experimenting with new contraptions: he took bottled oxygen to use at high altitude, and wore a specially commissioned coat made from bright green hot-air balloon fabric stuffed with the down of eider ducks." George Finch therefore tended to keep to himself.

1
The text says: "'Today has been bitterly cold with a gale of a wind to liven things up,' Finch wrote in his diary. 'Everybody now envies my eiderdown coat and it is no longer laughed at.'" Find recorded that the weather conditions therefore influenced his companions' views.

2
The text says: "Two years later Mallory joined another expedition to Everest but went missing close to the top; his climbing feats were then romanticised by a hero-hungry public." After an unsuccessful expedition, Mallory's achievements were therefore idealised.

3
The text says: "Today, climbers at high altitude routinely carry oxygen." Finch therefore left his mark on climbing by making one device standard equipment.

4
The text says: "When Edmund Hillary and Tenzing Norgay finally made it to the top of Everest in 1953, they wore down snowsuits." A piece of clothing stuffed with feathers was therefore used during a historic event.

5
The text says: "And fortunes have been made off the back of them: Canada Goose, which specialises in 'extreme weather' wear, has built a multi-billion-dollar brand from its puffer coats; so has Moncler." In its history, the down jacket has therefore earned some companies lots of money.

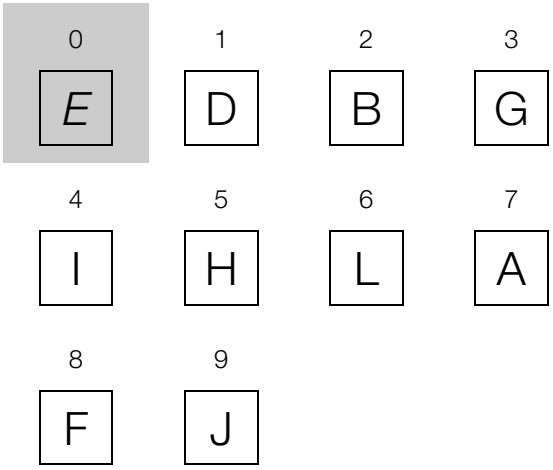

6
The text says: "And 80% of those feathers come from one country: China." Worldwide, the need for down is therefore largely met by one single nation.

7
The text says: "The down in our coats is, in fact, a by-product of the ducks and geese that end up on dinner tables." The feathers used to stuff our jackets are therefore taken from birds reared for consumption.

Textquellen: Rabinovitch, Simon: Down payment: the secret economics of your winter coat. https://www.economist.com/1843/2019/11/14/down-payment-the-secret-economics-of-your-winter-coat [24.04.2025] (adaptiert).

Korrekturhinweise

London’s best quirky restaurants

Begründungen

0
The text says: “Sketch turns eating and drinking into a whole new experience, boasting several venues at its base near Regent Street that are among the best restaurants in London. The hardest part is choosing between the three-Michelin-starred Lecture Room, the woodland-themed lunch venue, Glade, the brasserie-style Gallery, and The Parlour, an eccentric patisserie, restaurant and bar.” This dining destination therefore makes it difficult for customers to decide on one of its locations.

1
The text says: “Settle down for a quirky culinary experience at Dinner by Heston Blumenthal, a two-Michelin-starred restaurant that's consistently voted one of the best restaurants in the world. The celebrity chef taps into Britain's rich culinary history with unusual results, such as the signature Meat Fruit starter, where chicken parfait is served in the guise of a clementine.” This dining destination therefore serves top-rated traditional food in unexpected ways.

2
The text says: “Nibble on pan-Asian cuisine in the futuristic dining room at Circus, created by British designer Tom Dixon. Glamorous eating and drinking is not all that occurs at this Covent Garden restaurant, as dinner is combined with various surprise cabaret and circus acts who parade across the tables.” This dining destination therefore integrates marvellous oriental food and live happenings in its innovative venue.

3
The text says: “Take your children to the Jungle Cave, one of the most fun restaurants in London. Kids go wild experiencing the sounds of waterfalls, lightning and rain, as they spot animals and real tropical fish. Close to Piccadilly Circus and the West End's many theatres, shops and attractions, this family restaurant offers a two-course kids menu and activity packs.” This dining destination therefore is the perfect choice for one age group because it offers outstanding entertainment and is conveniently located.

4
The text says: “This Asian fusion restaurant in Covent Garden boasts a pioneering interactive ordering system projected onto the table, making it one of the coolest restaurants in London. At Inamo, you can place orders via a 3D menu, choose from a selection of virtual tablecloths, find out about the local neighbourhood and even order a taxi home, all from the comfort of your seat.” This dining destination therefore offers oriental food and smart state-of-the-art equipment for the convenience of the customer.

Textquelle: Autor/in nicht genannt: 15 best quirky London restaurants. https://www.visitlondon.com/things-to-do/food-and-drink/restaurant/quirky-london-restaurants [24.04.2025] (adaptiert).

5
The text says: “Dining at Notting Hill's Beach Blanket Babylon is like stepping between a Georgian English manor house and a French chateau. If the vintage furnishings, imposing statues and all-round extraordinary decor don't inspire awe at this celebrity hotspot, the seasonal, modern European food will.” This dining destination therefore features an unusual mixture of classical interior design and the latest continental food.

6
The text says: “Mix arias with appetisers at Bel Canto. This opera-themed restaurant near Hyde Park serves up French fine dining with a difference: it’s delivered by waiters singing opera classics. So, sit back, relax and enjoy the music – don’t worry, you’ll not have to sing for your supper.” This dining destination therefore pays tribute to a special art form and employs staff members who do two jobs at the same time.

7
The text says: “Tuck into steaks, ribs and sliders as you listen to live music requested by you and the rest of the audience in a Victorian warehouse, at The Piano Works in Farringdon. Part live jukebox, part restaurant, this music-lovers’ favourite will have you singing long into the night.” This dining destination is therefore housed in a historical building and spoils customers with meat dishes and acts they choose.

8
The text says: “Golden Buddhas, dwarf palm trees and giant peacock feathers give Archipelago's interior a quirky feel, but it's the menu ‘staples’ such as crocodile, kangaroo, and ostrich that really makes this one of the most unusual places to eat in London. This Fitzrovia restaurant certainly reaches out to intrepid diners with options such as python carpaccio, and jerk alpaca.” This dining destination therefore attracts customers with its unconventional furnishing and decoration as well as its exotic dishes.

9
The text says: “Eat within the walls of a prison at The Clink Restaurant based at HMP Brixton. Many of the ingredients are sourced from prison farms around the country, while everything is cooked and served by the prisoners as they train for careers in hospitality after their release. Not only does this unique dining experience help with rehabilitation, the food is excellent and of good value too.” This dining destination therefore presents customers with an unusual venue that is largely self-supplying and with staff learning a new job.

Begründungen

0
The text says: "In his book *The Weather Machine*, author Andrew Blum discusses these extremes and much in between, taking readers back in time to early weather-predicting aspirations and forward with speculation about the future of forecasting, including potentially dark clouds on the horizon." In *The Weather Machine,* the writer therefore considers what might happen to the future of weather forecasting.

1
The text says: "The very idea of forecasting weather across great distances was essentially a non-starter until information was able to travel faster than the weather itself. With faster-than-weather communication systems like telegraphs, the landscape of forecasting was transformed." With respect to dimensions, before scientific progress was made, it was therefore impossible to predict the weather over great distances.

2
The text says: “With faster-than-weather communication systems like telegraphs, the landscape of forecasting was transformed. Suddenly, in the mid-1800s, it became possible to map out phenomena like the paths of hurricanes by relaying data in real time.” Scientific advances therefore enabled the prediction of the course of natural events such as hurricanes.

3
The text says: “His [Bjerknes] so-called ‘Primitive Equations’ are still part of weather modeling today, but at the time, he lacked the mathematical tools to actually solve them.” To develop his idea, Bjerknes would therefore have needed the appropriate mathematical tools.

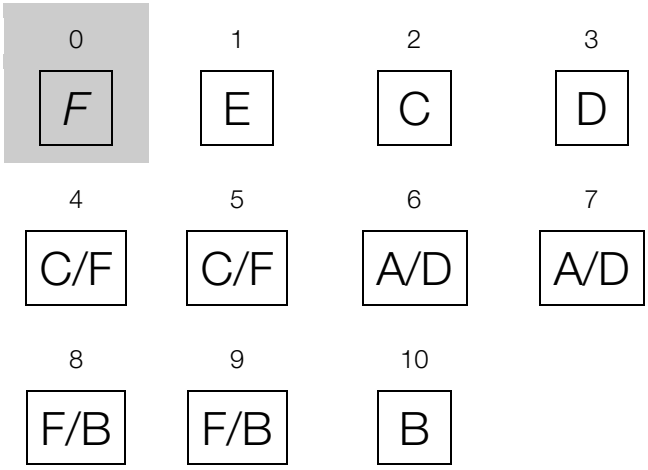

4
The text says: “Throughout the first half of the 20th century, weather forecasts were indeed created and used, but they were mostly based on general observations rather than rigorous mathematical calculations.” The first weather forecasts that served practical purposes depended therefore largely on general observations.

5
The text says: “As President Kennedy was making his famous promise to put a man on the moon, he also made a less-remembered call for a global weather forecasting system, making it part of a larger promise about the future of technology that would rely on unprecedented global cooperation.” One politician therefore claimed that technical progress was going to need global cooperation.

6
The text says: “The World Meteorological Organization gathers once every four years to discuss issues and solutions in their much-advanced field. They discuss specific technical challenges as well as big-picture dilemmas, like the rise of private company interest in the forecasting business. With the threat of climate change, there is more at stake and privatized forecasting enterprises are entering the fray.” Concerning weather forecasting, one development is therefore the increasing involvement of private companies.

Wales

Begründungen

0
Text F contains the answer: “Inland, the fecund heartland of rural Carmarthenshire is little touristed but a treat for the green-fingered traveller, with nationally significant parks and gardens scattered about.” According to the text, Swansea, Gower & Carmarthenshire therefore attract people interested in growing plants.

1
Text E contains the answer: “[…], but few attract more admiring stares than the glamorous trio of Caernarfon, Conwy and Beaumaris, which is why they’re recognized as World Heritage Sites today.” According to the text, Anglesey & the North Coast therefore have international significance.

2
Text C contains the answer: “Crisscrossed with country lanes and dedicated cycling and walking routes, it’s an excellent area to explore under your own steam.” According to the text, Aberystwyth & Mid-Wales therefore offer only land sports.

3
Text D contains the answer: “The gem in this diadem is Snowdonia National Park, where the mightiest peaks south of Scotland scrape glowering skies.” According to the text, Snowdonia & the Llyn therefore have spectacular summits.

4+5
Text C contains the answer: “[…] Mid-Wales is often overlooked. Yet this region of plunging coastline, wooded river valleys and small market towns is something of a well-kept secret.”

Text F also contains the answer: “Inland, the fecund heartland of rural Carmarthenshire is little touristed but […].”

According to the texts, Aberystwyth & Mid-Wales and Swansea, Gower & Carmarthenshire therefore get few visitors.

Textquelle: Dragicevich, Peter und Hugh McNaughtan: Wales. Lonely Planet 2017, S. 76, 120, 147, 185, 219, 265 (adaptiert).

6+7
Text A contains the answer: “To the west, the dramatically serried South Wales valleys tell the story of the Industrial Revolution through heritage sites and still close-knit communities.”

Text D also contains the answer: “This part of Wales really packs it in, from rugged mountain trails to coastal paths, old industrial sites and heritage train lines.”

According to the texts, Brecon Beacons & Southeast Wales and Snowdonia & the Llyn therefore provide an insight into a time when machines were important.

8+9
Text B contains the answer: “On top of its natural assets, Pembrokeshire offers a wealth of Celtic and pre-Celtic sites, forbidding castles, fascinating islands and little St Davids – the magical mini-city with its chilled vibe, spectacular cathedral and abiding association with Wales’ patron saint.”

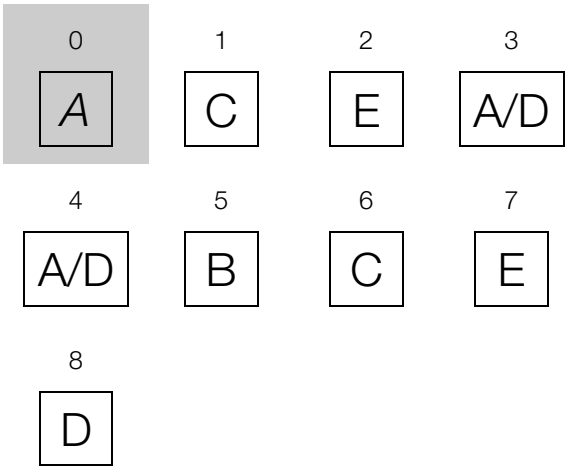

Text F also contains the answer: “Swansea delivers something approaching big-city sophistication, with a glorious stretch of sand arcing between a slowly regenerating city centre and its beach suburb […].”

According to the texts, St David’s & Pembrokeshire, and Swansea, Gower & Carmarthenshire therefore provide a touch of urban flair.

10
Text B contains the answer: “[…] in summer people flock here from all over Britain to enjoy the spectacular walking, surfing, coasteering and sea kayaking, as well as the glorious beaches and abundant marine life.” According to the text, St Davids & Pembrokeshire therefore have excellent conditions for sea creatures.

Uncomfortable camping holidays

Begründungen

0
Text A contains the answer: “After a couple of hours spotting seals, abseiling and rock climbing with our very patient guide, we abseiled down to our bed for the night, and spent the next seven hours lying on a portable ledge above the crashing waves.” The campers in paragraph A therefore spent the night in an unusually dangerous place.

1
Text C contains the answer: “Ridiculously high winds, incessant torrential rain and flooding hit in late July, transforming our campsite in north Norfolk into an apocalyptic disaster scene, complete with soaking wet clothes and bedding, a collapsed tent, shattered tentpoles and floating air beds. We drove to the local Travelodge.” The campers in text C therefore finally decided to escape a risky situation.

2
Text E contains the answer: “However, the elemental beauty of the extreme weather was invigorating to us. We left feeling refreshed and glad of the experience.” The campers in text E therefore enjoyed the positive side of a rainstorm.

3 + 4
Text A contains the answer: “I spent the night going from laughter to fear. There were some moments of calm however, and we even spotted a few shooting stars.” The camper in text A therefore experienced two contrasting emotions.

Text D also contains the answer: “My partner and I looked at each other half-petrified, half in awe of its beauty.” The campers in text D therefore experienced two contrasting emotions.

5
Text B contains the answer: “Every night we were attacked by large slugs, which got caught in our hair.” The campers in text B therefore had physical contact with animals.

6
Text C contains the answer: “I’ve experienced extreme discomfort while camping in the past: body-numbing cold, subsiding tents and violent electric storms. But while these climatic experiences are common to intrepid campers, Storm Evert was something else.” The camper in text C was therefore surprised despite having a history of camping.

7

Textquelle: Autor/in nicht genannt: ‘Our campsite was an apocalyptic disaster scene’: readers’ summer camping stories. www.theguardian.com/lifeandstyle/2021/aug/26/our-campsite-was-an-apocalyptic-disaster-scene-readers-summercamping-stories [27.10.2023] (adaptiert).

Text E contains the answer: “Undeterred, we sat it out as rivers of rainwater poured off our shelter.” The campers in text E therefore refused to leave their tents despite the poor weather.

8

Text D contains the answer: “Assuming it was an escaped sheep, we peeked outside. What we saw was a huge red stag, antlers and all, chewing the vegetation outside our tent.” The campers in text D were therefore proven wrong when checking out a situation more closely.

Are insects disappearing?

0	1	2	3	4	5	6	7
A	B	D	C	D	B	A	A

Begründungen

0
The text says: "A recent study adds to an emerging narrative of severe decline and builds on the perception that there were more insects in nature in years gone by – and that things were better in the past." Some new scientific research on insects therefore used subjective belief as a starting point.

1
The text says: "Understanding the severity of insect decline requires detailed and long-term records of species changes." Being able to fully grasp developments in the insect world is therefore dependent on lengthy in-depth observation.

2
The text says: "The "splatometer" joins other established monitoring initiatives including light traps for moths and other night-flying insects, and walk-and-count transects for butterflies." A new method of investigating the insect population is therefore used alongside other methods.

3
The text says: "An important finding from recent analyses is that patterns of change are more complex than statements pointing to catastrophic declines would have you believe." Current data on the drop in insect numbers have therefore shown that developments are less straightforward than they seem.

4
The text says: "Analysis of nearly 50 years of insect data reveals long-term declines in moths but not aphids, and that there is evidence of shorter-term periods of recovery – a decidedly more optimistic picture than you might imagine." A study spanning several decades has therefore shown that changes are probably less dramatic than assumed.

5
The text says: "Another problem is that the types of datasets that are analysed, such as the number of species at a site or types of species present, and the measurements that are taken may not always tell the same story." One critical challenge when evaluating information about insects is therefore that data and observation results might differ.

6
The text says: "Given the current focus on tree planting and increasing woodlands in the UK, it is concerning that moth declines are worst in woodlands, for instance." With regard to one current UK measure, researchers are therefore worried that the measure fails to show an immediate positive effect.

7
The text says: "There are many examples where careful management and restoration of sites can hugely boost biodiversity, but we need to be doing this over much more of the landscape. The introduction of butterflies into the Cotswolds and Rockingham Forest are examples of success. For many species, we already know how to manage landscapes to ensure their success." In cooperation with the authorities, it has therefore been possible to reintroduce insects to certain areas.

Textquelle: Hill, Jane: How worried should we really be about 'insectageddon'? www.theguardian.com/commentisfree/2022/may/08/worried-about-insectageddon-insect-decline [27.10.2023] (adaptiert).

8

Text D contains the answer: “Assuming it was an escaped sheep, we peeked outside. What we saw was a huge red stag, antlers and all, chewing the vegetation outside our tent.” The campers in text D were therefore proven wrong when checking out a situation more closely.

Textquelle: Krakauer, Jon: *Into Thin Air*. New York: Pan Books 1998, S. 123 –125 (adaptiert).

				But just before he I was at the Worrying that I was

Begründungen

0
The text says: "Rob had told us to be ready to leave at 4:45 sharp […] which allowed barely enough time to dress, force down a candy bar and some tea, and strap on my crampons." The author therefore could not prepare for the day's climb without rushing.

1
The text says: "'What makes you think I ever went to sleep?'" Doug therefore implied that he had been awake all night.

2
The text says: "Yanking the laces tight made me wince in pain; for the past two weeks the condition of my cracked, bleeding fingertips had been steadily deteriorating." The author therefore did not have a problem that made his footwear uncomfortable.

3
The text says: "I tramped out of camp by headlamp behind Rob and Frank, wending between ice towers and piles of rock rubble to reach the main body of the glacier." First the climbers therefore had to get past obstacles.

4
The text says: "I picked up the bottom end of it, attached my jumar to the slightly frayed line, and began to climb." The author therefore connected himself to a climbing aid.

5
The text says: "I had an extra pile sweater in my backpack but to put it on I would first have to remove my gloves, pack, and wind jacket while dangling from the fixed rope. Worrying that I was likely to drop something, I decided to wait until I reached a part of the face that was less steep, where I could balance without hanging from the rope." The author therefore felt it would be a bad idea to deal with a certain problem in his present position.

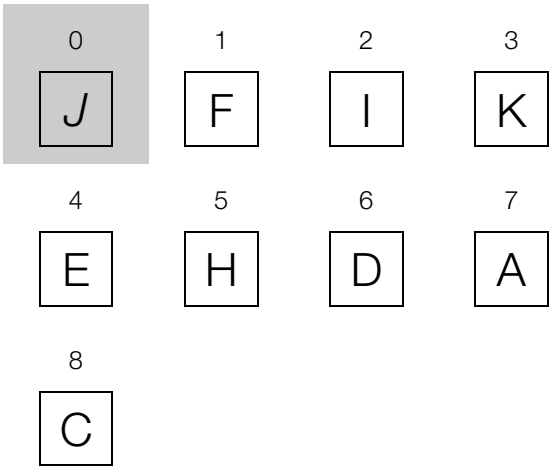

6
The text says: "A carapace of ice formed over my goggles, making it difficult to see." The author's eyes were therefore not unprotected.

7
The text says: "I was at the head of the line, at 23,000 feet, fifteen minutes in front of guide Mike Groom; I decided to wait for him and talk things over." The author therefore did not want to consult the climber ahead of him.

8
The text says: "'Rob wants everybody to go down!' he declared, shouting to make himself heard above the wind." Mike therefore did not pass on Rob's message to everyone via his communication device.

Korrekturhinweise

How to get accepted for a top position

Begründungen

0
The first part of the paragraph says what professional-services firms expect of their employees, giving examples. The text says: "They also expect their employees to spend extraordinary amounts of time together— learning the ropes in boot camps, working late in the office, having constant work dinners, getting stuck together in airports in godforsaken places."

1
The second part of the paragraph describes the type of relationship professional-services firms wish their employees have with each other. The text says: "Recruiters repeatedly told Ms Rivera that they looked for people who could be their friends as well as their colleagues."

2
The paragraph says what one can do to show that one identifies with the firm and what is definitely not appropriate for a professional-services firm. The text says: "Even if you do not go that far, you must at all costs avoid appearing nerdy or eccentric: there are plenty of jobs with tech companies for those types."

3
The paragraph explains the importance of identifying with the interviewer. The text says: "Emphasise any similarities that you can find between the two of you. If the interviewer sees a little bit of himself in you, a phenomenon known as 'looking-glass merit', he will regard any attempt to eliminate your name as a personal slight."

4
The paragraph says that even without the advantage of a qualification from a top university, it is still possible to be accepted for a top job by making use of connections. The text says: "As for those who have not got into the elite universities, all hope of joining the bulge bracket of professional-services firms is not lost. As Ms Rivera's book demonstrates, even the most tenuous connection with insiders can be of help."

5
The paragraph begins by saying that a less privileged background need not be a disadvantage at an interview for a professional-services position. The text says: "Ms Rivera notes that coming from an underprivileged background can actually be a plus, if sold well. Recruiters love to hear stories about gritty candidates triumphing against the odds."

Textquelle: Autor/in nicht genannt: How to join the 1%.
http://www.economist.com/news/business/21651207-book-persistence-elites-unexpected-guide-getting-good-job-howjoin [27.10.2023] (adaptiert).

6
The paragraph continues by saying what those from a less privileged background can do to succeed. The text says: “She also notes that there are organisations that can help non-elite candidates to sell themselves.”

7
The paragraph continues by giving an example of one of the organisations referred to in the previous sentence. The text says: “Sponsors for Educational Opportunity, an American outfit, has an excellent record of pre-selecting ethnic-minority youngsters and getting them internships that can lead on to full-time jobs.”

8
The paragraph comments on the main idea of the whole text. The text says: “This overwhelming emphasis on style rather than substance may seem an odd way to select members of the 1%. But those at the top of the consulting, investment-banking and legal professions know that the most prized possession in uncertain times is not brainpower, but self-confidence.”

Korrekturhinweise

A different kind of sightseeing

0	1	2	3	4	5	6
A	B	C	B	A	D	C

Begründungen

0
The text says: “Our guide, Erik, points out the sights: a famous hotel, a secret church, the seven bridges view but we are distracted, focused on the plastic debris that bobs by our boat. As with more than 15,000 people before us, we have jumped on board one of Amsterdam’s most unusual boat trips: a plastic fishing tour of the canals – and we are eager to see what we can find.” The visitors touring the waterways therefore watch out for objects in the water.

1
The text says: “In fact, I’m travelling with seven tourists who have paid to collect rubbish as part of their holiday.” The author is therefore part of a group which spends money to gather litter.

2
The text says: “My conviction was that there were millions of people like me who wanted to contribute [to change that] in a positive way.” Mr Smit therefore strongly believed that many were keen to do something about the situation.

3
The text says: “Anne Jakobsen from Copenhagen, fishing alongside me, is a good example. She and her husband, Ole, have brought the family along ‘to lift the carbon footprint we leave behind. And show the kids you can do something other than the Rijksmuseum,’ she says.” One couple on the boat therefore told the author that they wanted to reduce the family’s environmental impact.

4
The text says: “And with the announcement today of the world’s first plastic-free supermarket aisle opening in Amsterdam, the city is now seen as a leader in the fight against plastic pollution.” As a consequence of the growing concern about plastic, an area of one store will therefore do without plastic.

5
The text says: “Around 8,500 rescued bottles have been used to make the plastic boat we are travelling in. It’s a circular solution to the problem: the more plastic collected, the more boats can be built and the broader the clean-up operation.” Some of the plastic trash collected is therefore used to manufacture the tour vehicles.

6
The text says: “Since plastic fishing began, he tells us, the canals have revealed an underworld of wallets, passports, and car keys discarded by thieves or dropped by drunken tourists.” One side effect of the tours is therefore that stolen objects have reappeared.

Textquelle: Nicholls-Lee, Deborah: Fishing for plastic: the Amsterdam canal tour with a difference. https://www.theguardian.com/travel/2018/feb/28/fishing-for-plastic-amsterdam-canal-tour-with-a-difference [22.03.2024] (adaptiert).

8	X		"Getting to see everyone	I ride a high When I spoke to Yoga teachers, it seems

Begründungen

0
The text says: "At 16 I signed up for it – along with all the other misfits who weren't enrolled in typical private-school sports such as lacrosse or field hockey – and learned crow pose and breathing techniques from a long-haired ageing hippie with a gentle demeanour." When Meltzer started yoga at school, it was therefore contrary to the norm.

1
The text says: "I have never thought of myself as a natural teacher, but I loved it." Meltzer therefore has not always felt that she is good at instructing others.

2
The text says: "I like being in charge, putting together a playlist, watching students tumble out of class in a relaxed afterglow." Meltzer therefore enjoys being in control and responsible for a situation.

Textquelle: Meltzer, Marisa: Yoga with Adriene: how the YouTube star won lockdown. https://www.theguardian.com/lifeandstyle/2020/apr/30/yoga-with-adriene-how-the-youtube-star-won-lockdown [22.03.2024] (adaptiert).

3
The text says: “Friends came by, but so did people I didn’t know, and they started to come every week, which was thrilling: I knew what I was doing enough that people wanted more.” Because of the encouraging reaction of her students, Meltzer therefore became more confident.

4
The text says: “My yoga studio provided its teachers with notes on setting up, from how to best position our phones to tips on creating as inviting a space as possible in a tiny New York apartment (plants and natural light are good, dirty floors and clutter are best avoided).” Meltzer therefore did not have to invest a lot of time in finding out how to create a pleasant atmosphere in her yoga sessions.

5
The text says: “I tend not to speak a lot during my classes. It’s a conscious choice based on years of wishing that I could zone out and not have to hear a teacher chattering along. But a lot of silence while demonstrating poses alone in front of a screen just translates to dead air, which feels awkward, so I found myself making commentary to fill up the silence.” Meltzer therefore talks more in her lessons than before.

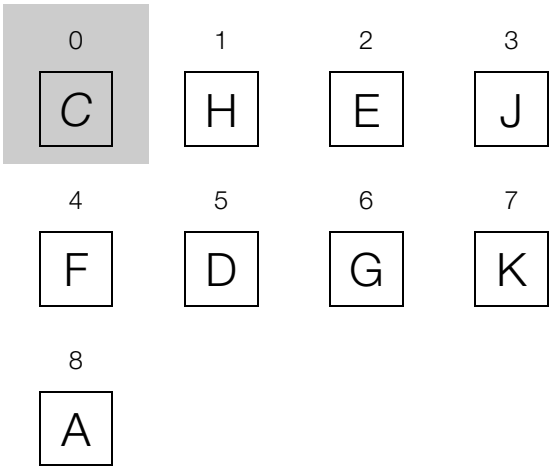

6
The text says: “But I also loved that anyone could join, and students could say hello or send a comment through the app. (That said, I could have done without the person who kept messaging me to say I should change my music.)” Meltzer therefore did not appreciate one participant’s feedback on one feature.

7
The text says: “Because so many studios have taken their classes online, I’ve also got to tune into some of my favourite far-flung teachers and friends, from Portugal to Los Angeles.” Due to current conditions, Meltzer is therefore in touch with her colleagues.

8
The text says: “‘Getting to see everyone, talk and hang out in the moments before and after class, getting to watch the students as they practise and teach right to them, it’s been incredible and unexpected,’ she [Kyle Miller] said”. One of Meltzer’s colleagues therefore states that online lessons leave room for some private exchange.

Korrekturhinweise

Marketing for millennials

Begründungen

0
The paragraph begins by drawing a comparison between elderly people and old firms. The text says: "Older people are not the only ones to try too hard to be hip and youthful. Long-established firms can, too."

1
The paragraph continues by giving an example to illustrate the point made in the previous sentence. The text says: "Just look at Procter & Gamble (P&G), one of the world's largest consumer-goods firms, which this year applied to America's federal patent office to trademark LOL, NBD, WTF and FML, abbreviations commonly used in text messages and social media. If it succeeds, the 181-year-old firm plans to use the phrases to market soap, cleaners and air fresheners to young buyers."

2
The paragraph begins by saying that firms do not understand what characterises millennials. The text says: "To many they are a mystery. KPMG, a consultancy, reckons nearly half do not know how millennials—typically defined as those born between 1980 and 2000—differ from their older counterparts."

3
The paragraph continues by saying that much of what is believed about millennials is inaccurate and illustrates this point with an example. The text says: "Many claims about them are simplified or wrong. It is often said, for example, that they ignore conventional ads; in fact they are heavily influenced by marketing."

4
The paragraph begins by stating the consequence of the point made at the end of the previous paragraph and illustrates this consequence with an example. The text says: "Given such misconceptions, it is little wonder that firms sometimes get it wrong. In February, MillerCoors, […] released Two Hats, a […] brew the beer-maker said would suit millennials' tastes and budgets […]. Consumers just waited; the beer was pulled from shelves after six months."

Textquelle: Autor/in nicht genannt: Established firms try dancing to a millennial tune. https://www.economist.com/business/2018/10/04/established-firms-try-dancing-to-a-millennial-tune [22.03.2024] (adaptiert).

5
The paragraph takes up the first of the three approaches mentioned in the previous paragraph; transparency, and gives an example. The text says: "In clothing, one example is Everlane, an online clothing manufacturer based in San Francisco. It discloses the conditions under which each and every garment is made and how much profit it generates as part of its philosophy of 'radical transparency'."

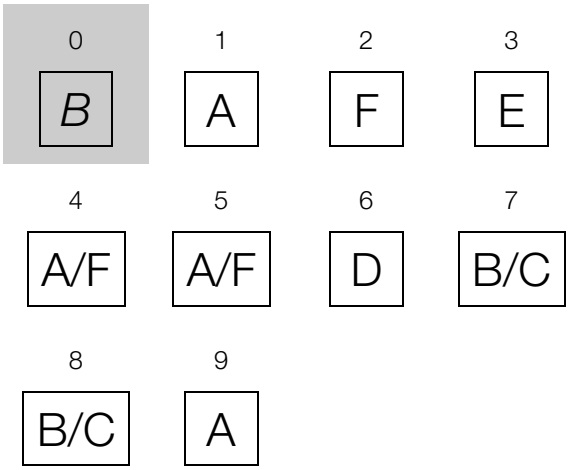

6
The paragraph gives an example of a firm that has attracted millennials by becoming more transparent. The text says: "ConAgra, an American food giant, has simplified its recipes and eliminated all artificial ingredients from many of its snacks and ready meals. After years of falling sales, it is growing again; millennials now account for 80% of its customer growth."

7
The paragraph takes up the second of the three approaches mentioned; experiences (over things), and illustrates this with examples. The text says: "Millennials' appreciation of experiences over 'stuff' is also real. Online platforms such as Airbnb have capitalised on youngsters' taste for splurging on holidays, dinners and other Instagrammable activities, but so too have some older bricks-and-mortar firms."

8
The paragraph takes up the third of the three approaches mentioned; flexibility, and illustrates this with an example related to the financial situation of millennials. The text says: "Younger consumers also have more debt, fewer assets and less job security than previous generations. In this regard, flexibility matters. Ally Bank, a subsidiary of Ally Financial, the former financial wing of General Motors, for example, does not charge its current-account customers any maintenance fees or require them to hold minimum balances."

The new age of the airship

0	1	2	3	4	5	6	7
B	A	D	C	A	D	C	B

Begründungen

0
The text says: "Imagine a bird's eye tour of the North Pole or Great Barrier Reef. Some believe luxury airships could even become playthings of the super-rich, decadent floating mansions that offer the same status as a luxury yacht." Special airships therefore have the potential to provide similar prestige as expensive boats do.

1
The text says: "'I've long believed that hybrid airships would be best placed to disrupt global shipping given their volumetric capacity, the increasing desire for rapid delivery of goods from overseas, and the fact that their speed and operating cost would enable faster delivery than by ship with a proportionally lower increase in transportation cost,' says John-Paul Clarke, professor of aerospace engineering at the University of Texas at Austin." According to one expert, the distribution of goods via airships would therefore prove to be a lot quicker.

2
The text says: "International shipping doesn't have to be fast, so transporting food or chemicals by airship could save significant carbon emissions compared to large freight vessels at sea." Delivering certain goods by airship might therefore improve the ecological footprint of the products.

3
The text says: "But if helium – which is also a non-renewable resource – isn't the answer, then it raises two alternative H-words, both with rather negative connotations: hydrogen and Hindenburg. In 1937, the most infamous airship that ever flew exploded midair and crashed in front of photographers and filmmakers, killing 36 people." Another fuel option for powering airships therefore reminds people of a certain event.

4
The text says: "'Hydrogen is the obvious alternative to helium,' says Clarke. 'It can be produced greenly and more and more cheaply with each passing day. It has an unfortunate reputation due to past accidents [but] we have learned a lot over the years about how to handle hydrogen, especially in transportation settings, and it is now being used to propel cars, trucks, and aircraft'." According to one expert, the fuel that could be used in the future has therefore successfully powered other vehicles.

5
The text says: "So what's it like to fly in an airship? According to Durham, a trip on HAV's Airlander would be a lot smoother than modern flight. 'It's a low-noise, low-vibration, low-turbulence cabin space where in many operations you may even be able to open a window'." Travelling in a modern airship, passengers will therefore experience a more stable journey than on a plane.

6
The text says: "Clarke and Hunt both doubt that airships offer a viable alternative to short-haul flights, citing issues like wind variability and logistical issues, but Durham remains optimistic." Concerning the future of airships, two experts therefore question their suitability for brief journeys.

Textquelle: Taylor, Ian: The new age of the airship: Could blimps be the future of air travel? https://www.sciencefocus.com/future-technology/the-new-age-of-the-airship-could-blimps-be-the-future-of-air-travel/ [10.04.2024] (adaptiert).

7

The text says: "'There will be sweet spots that work for our product and there will be spaces that won't work. It's probably not going to work for long-haul flights,' he says. 'I think they have a place to play in society moving forward'." Durham therefore believes that airships will be a useful means of transportation in some situations.

Begründungen

0
The text says: "Quang Nguyen dates his decision to no particular moment: he simply did not want to spend a big chunk of his classroom time on communist ideology, as is standard in his native Vietnam." One student therefore considered a specific aspect of the school curriculum as too dominant.

1
The text says: "Joy Lin was looking for a better course than she could find in China, with more social activities on campus and the chance to gain foreign work experience after graduating." One student therefore went abroad to have the option of getting a practical insight into the world of work after leaving university.

2
The text says: "All four students ended up at the University of Miami in Florida, for reasons that varied as much as those that pushed them to leave home in the first place: good weather, highly regarded courses in subjects they liked, student aid and in one case a scholarship." One of the young people getting into one particular university therefore received financial support.

3
The text says: "Japan has a goal of 300,000 foreign students by 2020, 60% more than now; Malaysia, of almost doubling numbers to 250,000 by 2025." Several non-European countries therefore are just beginning to target young people from abroad.

4
The text says: "Foreigners, who can be charged more, help pad out budgets and subsidise local students." Students from abroad are therefore not a financial burden for universities.

5
The text says: "Today Anglophone countries take the biggest share, since English is quite a useful language to acquire." A high proportion of those going to university abroad therefore choose their destination for the same specific reason.

6
The text says: "Its best universities have long attracted the very brightest foreign minds, especially in the sciences, often luring them with generous scholarships." In one particularly popular countr,y high achievers therefore may get financial support.

7
The text says: "One reason is tighter visa rules imposed after the terrorist attacks of 2001; another is that students must seek special permission to work off-campus while studying, and it is hard to stay and work for long after graduating. Longer-term employment visas are also hard to get, so many students without deep pockets choose to go elsewhere so they can defray some of the cost." Foreign students therefore cannot do a job outside university without additional approval.

8
The text says: "Students usually choose their target country first and then decide which college to apply to." The preferred educational institution is therefore not generally top priority for young people who want to study abroad.

Text B contains the answer: "Lonely bays, deserted beaches and crystal-clear lagoons offer superb snorkelling and diving among myriad forms of sea life, including humpback whales, manta rays and loggerhead turtles. World Heritage-listed Ningaloo Reef is one of the very few places where you can swim with the world's largest fish, the gentle whale shark." Ningaloo Coast therefore enables visitors to meet sea creatures in their natural habitat.

1
Text E contains the answer: "'Rotto' has long been the family-holiday playground of choice for Perth locals." Rottnest Island is therefore particularly popular with people who live nearby.

2 + 3
Text B contains the answer: "Lonely bays, deserted beaches and crystal-clear lagoons offer superb snorkelling and diving among myriad forms of sea life, including humpback whales, manta rays and loggerhead turtles."

Text D also contains the answer: "Offshore, bottle-nose dolphins and whales frolic, and devoted surfers search for – and often find – their perfect break."

Ningaloo Coast and Margret River are therefore suitable for water sport activities.

4
Text F contains the answer: "Every summit has an ancestral being associated with it, so it's appropriate to show proper respect when visiting." Stirling Range National Park therefore requires tourists to behave with consideration.

5
Text E contains the answer: "Although it's only about 19km offshore from Fremantle, this car-free, off-the-grid slice of paradise, ringed by secluded beaches and bays, feels a million miles away." Rottnest Island therefore gives the impression of being distant from a bigger city.

6
Text A contains the answer: "Australia's last frontier is a wild land of remote, spectacular scenery spread over huge distances, with a severe climate, a sparse population and minimal infrastructure." The Kimberley therefore has only basic facilities.

Textquelle: Atkinson, Brett et al.: *West Coast Australia*. Lonely Planet 2017, S. 98, 121, 147, 159, 165, 183, 205 (adaptiert).

7
Text F contains the answer: “Rising abruptly from surrounding flat and sandy plains, the Stirling Range’s propensity to change colour through blues, reds and purples captivates photographers during the spectacular wildflower season from late August to early December.” Stirling Range National Park therefore blooms brightly at one particular time.

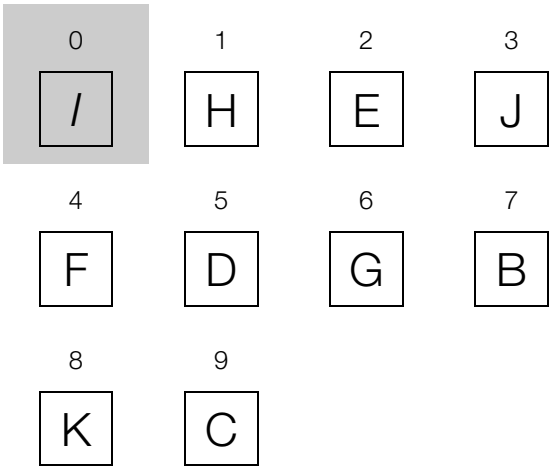

8
Text D contains the answer: “On land, world-class wineries and craft breweries beckon, and tall trees provide shade for walking trails and scenic drives.” Margret River therefore sells locally produced goods.

9
Text C contains the answer: “Even busy summer holiday periods in the Great Southern are relaxed.” Southern Western Australia therefore still has a quiet atmosphere in the peak season.

10
Text A contains the answer: “Travelling here is a true adventure, and each dry season a steady flow of explorers search for the real outback along the legendary Gibb River Road.” The Kimberley therefore offers visitors the chance to get to the heart of the bush.

The data or the hunch

Begründungen

0
The paragraph is about the nature of interviews. The text says: “Most employers and some universities use interviews when deciding whom to hire or admit.”

1
This part of the paragraph describes how interviewers believe conversation is useful to complement interviewees’ data. The text says: “If you’re the one deciding, this is a reassuring practice; you feel as if you get a richer impression of the person than from the bare facts on their résumé, and that this enables you to make a better decision. The first theory may be true; the second is not.”

2
The paragraph elaborates on the ineffectiveness of interviews. The text says: “Decades of scientific evidence suggest that the interview is close to useless as a tool for predicting how someone will do a job. Study after study has found that organisations make better decisions when they go by objective data like the candidate’s qualifications, track record and performance in tests.”

3
This part of the paragraph is about the results of employers using different information sources in their interview. The text says: “When employers adopt a holistic approach, combining the data with hunches formed in interviews, they make worse decisions than they do going on facts alone.”

4
The paragraph elaborates on how discrimination can play a role in interviews. The text says: “The interview isn’t just unreliable, it is unjust, because it offers a back door for prejudice. In 2009, sociologists at Harvard sent volunteers to apply for actual jobs […].”

5
The paragraph describes a study which confirms that discrimination plays a role in interviews. The text says: “In 2009, sociologists at Harvard sent volunteers to apply for actual jobs, armed with identical résumés and similar interview training. They found that white applicants with a criminal record were offered jobs at the same rate as black applicants with no criminal record.”

Textquelle: Leslie, Ian: The data or the hunch.
https://www.economist.com/1843/2015/06/18/the-data-or-the-hunch [10.04.2024] (adaptiert).

6
The paragraph elaborates on the findings of a sociologist regarding preferential treatment among people of higher socioeconomic status. The text says: “In a new book, *Pedigree*, the sociologist Lauren Rivera documents the myriad ways in which the members of American elites favour each other. She examined the hiring processes of leading law firms, banks and management consultants, and found them subtly biased towards applicants from wealthy backgrounds, usually in ways of which the employers weren’t aware.”

7
This part of the paragraph refers to common interests between interviewers and candidates. The text says: “Rivera found that interviewers were much more likely to recommend candidates with whom they struck up a rapport, which in practice meant those from a similar social background, someone they could talk to about skiing or deep-sea diving. When interviewers made this kind of personal connection, they were less likely to question the candidate’s résumé […].”

8
This part of the paragraph confirms the subconscious bias. The text says: “When interviewers made this kind of personal connection, they were less likely to question the candidate’s résumé and strong candidates from less privileged backgrounds were overlooked. A lawyer at an elite firm told Rivera that an interview was like a date.”

9
This paragraph explains why interviewers often follow their instincts rather than data. The text says: “Company boardrooms are filled disproportionately with people who are male, tall, handsome and speak in a deep voice. Fernández-Aráoz argues that this is because our intuitions about talent are influenced by criteria that made sense 60,000 years ago, when the vacancy you were looking to fill was a mating partner or someone who could kill wildebeest, and you needed to surround yourself with people like you to survive.”

7
Text F contains the answer: “Rising abruptly from surrounding flat and sandy plains, the Stirling Range’s propensity to change colour through blues, reds and purples captivates photographers during the spectacular wildflower season from late August to early December.” Stirling Range National Park therefore blooms brightly at one particular time.

8
Text D contains the answer: “On land, world-class wineries and craft breweries beckon, and tall trees provide shade for walking trails and scenic drives.” Margret River therefore sells locally produced goods.

9
Text C contains the answer: “Even busy summer holiday periods in the Great Southern are relaxed.” Southern Western Australia therefore still has a quiet atmosphere in the peak season.

10
Text A contains the answer: “Travelling here is a true adventure, and each dry season a steady flow of explorers search for the real outback along the legendary Gibb River Road.” The Kimberley therefore offers visitors the chance to get to the heart of the bush.

Happy Finland

0	1	2	3	4	5	6
C	C	D	B	C	B	D

Begründungen

0
The text says: "The UN World Happiness Index has declared that Finland is the world's happiest country in 2018, narrowly edging out…well, all the other Scandinavian countries. […] in the past few years these contented Nordic lands are on constant rotation in the happiness charts." The Scandinavian countries have therefore been found to have the most satisfied people.

1
The text says: "Being relentlessly upbeat and happy all the time is exhausting and, after a while, annoying." In the author's opinion, a state of constant cheerfulness is therefore eventually rather a nuisance.

2
The text says: "'The UN World Happiness Index has declared that Finland is the world's happiest country in 2018, […]. The problem is that the term 'happiness' is misleading. The word doesn't really do justice to the overall picture the survey reveals.'" According to the author, the UN World Happiness Index therefore has a title that might give the wrong idea.

3
The text says: "It strives to […] divine what makes people tick […]. Its questions reach beyond the simple fact gathering; it asks about contentment, about security and the generosity of others, about freedom." The data collected by the UN World Happiness Index therefore includes details of personal perceptions.

4
The text says: "Finland is a place of great natural beauty. What fills my heart with gladness is the sight of mountains, lakes and trees. All the countries in the top ten of the Happiness Index have these." The author therefore highlights a feature that is also found in other places that do well in the survey.

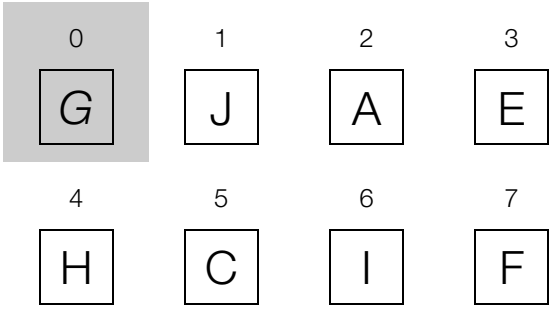

5
The text says: "To possess *sisu* is to have courage and tenacity and an indomitable spirit to carry on when others around you give up. It's having grit and determination to persist in the face of severe adversity […] will to *endure*." According to the author, *sisu* therefore means doing your very best no matter what happens.

6
The text says: "[…] Winter War of 1939-40 when the Finns' dogged resistance to the invasion of the Soviet Union's Red Army was seen as a prime example of *sisu*." At a certain difficult time in the past, the Finns therefore refused to accept a threatening situation.

Textquelle: Bailey, Bill: Finnish on a happy note. In: *Saga Magazine* 6/2018, S. 130 (adaptiert).

Gen Z

Begründungen

0
The paragraph is about how GenZ-ers like to work in contrast to millennials. The text says: "Early observations suggest that these young people may opt for headphones at work, collaborating and socializing in chat rooms, rather than in the open spaces set up by millennials."

1
The paragraph is about the skills and knowledge that GenZ-ers have. The text says: "Experts who spend their days thinking about office dynamics say that while members of Gen Z may not have the formal writing skills or emotional intelligence of baby boomers, they'll be able to teach older coworkers how to learn new tools and skills on the fly - the same way they have all their lives."

2
The paragraph is about GenZ-ers and their relationship with IT. The text says: "Gen Z-ers are accustomed to flitting between apps and expect that they can go online and teach themselves anything they want, without sticking to any one task for too long."

3
The paragraph is about Larissa May and the idea of having several careers at the same time. The text says: "'With Gen Z, I think we have these superhuman expectations for ourselves,' says Larissa May, a 23-year-old in New York who is coaching older executives on how to use social media, consulting for a direct-to-consumer candle company and running a multimedia platform called #HalfTheStory."

4
The paragraph is about how Gen Z-ers think about failure. The text says: "'Doing it all becomes increasingly possible as workplaces go virtual, expectations of working 9 to 5 go by the wayside and the concept of failure takes on an increasingly upbeat patina. Young people have 'a growth mind-set, where even if they mess up once, they're not going to let that mess-up define them […].'"

5
The paragraph is about a start-up virtual-reality company and what quality work is. The text says: "[…] 25-year-old Carissa Flocken says the bar for quality of work is high, 'but when and where you do it doesn't matter.'"

6
The paragraph is about the freelance economy and how insecure it is. The text says: "Jumping into the freelance economy means taking an uncertain path, as is betting one's future earnings on an educational program no one has tried before."

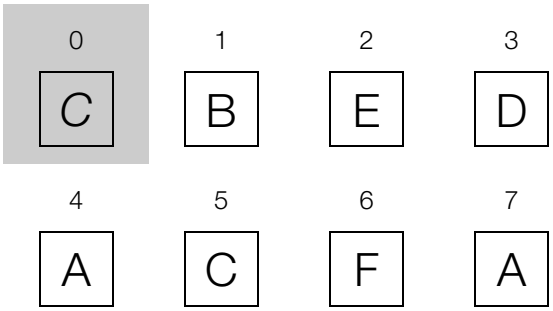

Textquelle: Steinmetz, Katy: Move over, millennials: How Generation Z is disrupting work as we know it. http://time.com/5066641/generation-z-disruption/ [17.11.2022] (adaptiert).

7

The paragraph is about how GenZ-ers see the future with or without a degree. The text says: “Where they see risk, he sees a chance to help prove that a new idea has merit - to be a pioneer.
‘There’s always going to be something special,’ Dew says, ‘about being the first.’”

Iconic packaging

Begründungen

0
Text C contains the answer: “Predating the countertop microwave by about a decade, Jiffy Pop was the first product to act as both a container and tool for cooking popcorn.” The Jiffy Pop packaging therefore also serves another important function.

1
Text B contains the answer: “The ease of grabbing your next Pringle from the can puts the focus on the food and eating experience, rather than on the hunt for a chip that's still in one piece.” The Pringles packaging therefore helps the consumer concentrate on the taste.

2
Text E contains the answer: “It's considered such an icon of form and function that the Kikkoman bottle is part of the Museum of Modern Art's collection.” The Kikkoman packaging has therefore proven to be both useful and stylish.

3
Text D contains the answer: “‘It's so engaging because it's the wrong material — it looks like a lemon but it's plastic,’ says Bird. The distinctive mold was created by carving out the shape, then imprinting a fresh lemon peel on top to give it a more natural texture.” The Jif Lemon Juice packaging therefore reflects its content visually and to the touch.

4
Text A contains the answer: “Long before Coca-Cola was associated with the color red, the clear glass bottle was etched with the brand's name in the scripted font the company has used for a full century.” The Coca Cola packaging therefore used one of its iconic elements much earlier than the other.

5
Text C contains the answer: “After scaling up production of aluminum during World War II, manufacturers struggled to find uses for it — especially in the area of food. But Jiffy Pop and other consumer products soon made aluminum a familiar part of the home.” The Jiffy Pop packaging therefore helped deal with spare material at a particular time.

6
Text F contains the answer: “Though the candy itself is often overlooked these days, its wrapping is iconic — from its colors to its recognizable font, Cooper Black.” The Tootsie Roll packaging is therefore probably more famous than its content.

Textquelle: Danovich, Tove: Looks matter: A century of iconic food packaging. https://www.npr.org/sections/thesalt/2015/03/16/392514497/looks-matter-a-century-of-iconic-food-packaging [17.11.2022] (adaptiert).

7

Text A contains the answer: “When asked to define the principles of good design, Andrea Lipps, assistant curator at Cooper-Hewitt, listed memorability, legibility and noticeability. Those three qualities certainly describe this product — ubiquitous not just on grocery shelves but in pop culture, gracing everything from Andy Warhol's art to Elvis Presley's lips.” The Coca Cola packaging therefore fulfills all essential formal criteria when it comes to appearance.

Begründungen

0
The text says: "By 1908, one fifth of Americans were subscribers. Anyone anywhere in the country could order a copy for free, look through it, and then have anything their heart desired delivered directly to their doorstep." The *Sears & Roebuck Mail Order Catalog* was therefore not available for a small charge.

1
The text says: "Today, those 1,400 pages provide us with a snapshot of American life in the first decade of the 20th century, from sheep-shearing machines and cream separators to telephones and china cabinets." The catalog therefore gives an impression of what America used to be like.

2
The text says: "This seal was to be broken on arrival by the new owner, who would open up their boxcar to find over 10,000 pieces of framing lumber, 20,000 cedar shakes and almost everything else needed to build the home — all the doors, even the doorknobs." Only the person who had bought the house was therefore supposed to unlock the container with the individual parts.

3
The text says: "Sears promised that, working without a carpenter and only rudimentary skills, a person could finish their Sears mail-order home in less than 90 days." Expert assistance was therefore not required to construct a Sears house.

4
The text says: "In so doing, they helped usher out the era of the custom site-built house, replacing it with the promise that homes could be standardized and affordable." Due to the Sears mail-order houses, housing therefore did not become individualized.

5
The text says: "Sears was not the first company to offer kit homes or a mail order catalog, but it came to dominate the mail-order market in part because its founder, Richard Sears, was that kind of expert that so many people would claim to be over the course of the 20th century but very few actually were: he was a marketing genius." Sears was therefore not so successful because it offered a unique product.

6
The text says: "[…] Richard Sears, was that kind of expert that so many people would claim to be over the course of the 20th century but very few actually were: he was a marketing genius. For example, according to lore, he intentionally made the Sears Roebuck catalog a little shorter and narrower than the Montgomery Ward one on the theory that it would naturally get stacked on top." It is therefore said that the man who started Sears came up with a simple idea that helped to promote his company.

7
The text says: "Most American families at the time were still living in multi-generational housing." Before Sears houses became successful, children, parents and grandparents therefore tended to share a home.

8

The text says: “The resulting *Sears Modern Home Program* was a hit, particularly after the end of World War I, the influx of returning veterans triggered a need for more housing.” Soldiers coming back home to America therefore led to an increase in demand for accommodation.

The life inside the library

0	1	2	3	4	5	6	7
C	B	D	A	C	D	B	C

Begründungen

0
The text says: "The New York Public Library had to figure out the best way to quickly get books into the hands of patrons. It built a $2.6 million rail line, which began operating in November, to move books from an enormous underground bunker to the main branch." The New York Public Library therefore installed a new system to shorten waiting times.

1
The text says: "Workers in the Milstein Research Stacks in Manhattan retrieve books from a 'pick list' sent to them from the library above and set the books on the track in protective red cars for delivery." In the new system, books are therefore transported in special containers.

2
The text says: "The 5,100-square-meter archive, kept at a climate-controlled 18 degrees and 40 percent humidity, houses about 1.5 million books. 'The air in here is better than most of Manhattan,' Johannes Neuer, the director of customer experience, told *The Times*." The books are therefore stored in a room which provides ideal conditions.

3
The text says: "For the last 26 years, Donald Vass has spent his days mending books in the Seattle area. He talks of his repaired books 'as if they were children heading out into a dangerous, unpredictable world,' Kirk Johnson wrote in *The Times*. 'I'm reluctant, many times,' said Mr. Vass, who is based in the King County Public Library, 'to send them out because I know what they're going to be up against.'" Mr. Vass is therefore hesitant to let go of the books he has restored because they might be treated badly.

4
The text says: "While Mr. Vass works to restore books, a group from Columbia University in New York is focused on another aspect: their smell. Jorge Otero-Pailos, a professor and director of historic preservation at Columbia, and a group of graduate students have teamed with the Morgan Library & Museum in Manhattan to preserve the odors of the private study of John Pierpont Morgan, one of America's wealthiest men when he built the library in 1906." At the Morgan Library, a research team is therefore trying to prevent a specific quality from being lost.

5
The text says: "'Under normal circumstances, we would have been kicked out of any museum if we were behaving the way we behaved: We were on all fours, putting our heads under Morgan's desk,' Mr. Otero-Pailos said after a recent trip. Instead, they were welcomed by Christine Nelson, curator of literary and historical manuscripts at the library." According to Mr. Otero-Pailos, the team was therefore treated favorably.

6
The text says: "'For years people have come to me and said: 'Oh God, it must smell so great where you work! I remember that old-book smell from my favorite library so well',' Ms. Nelson told *The Times*." Christine Nelson is therefore used to people saying that they associate her job with personal experiences.

7
The text says: "The team is working with a fragrance company to isolate the odors and determine their smell profile." Together with a firm, the Columbia research group therefore wants to analyze the elements of distinctive scents.

Textquelle: Wasielewski, Matt: The life inside the library.

The text says: "Almost 16,000 supercars – such as Ferrari, Bugatti, Aston Martin, Maserati and Koenigsegg models – were registered at UK addresses in the year to December 2019, according to figures released after a freedom of information request." A large number of British residents therefore acquired luxury cars in 2019.

1
The text says: "They cost from hundreds of thousands to more than £1m each […]." According to data, the price in pounds of the cheapest supercars acquired was therefore hundreds of thousands.

2
The text says: "Almost 16,000 supercars – such as Ferrari, Bugatti, Aston Martin, Maserati and Koenigsegg models – were registered at UK addresses in the year to December 2019, […]. The DVLA registered an increase of 12% from 14,000 in the previous year, according to the data released to the accountants UHY Hacker Young, and seen by *The Guardian*." 14,000 supercars were therefore purchased in the UK in 2018.

3
The text says: "UK celebrities, sports stars and business executives continue to snap up the latest supercars, leading to many manufacturers having lengthy waiting lists." Potential supercar buyers might therefore have to be added to lengthy waiting lists.

4
The text says: "[…] likely to see a bigger concentration of supercars outside of London as the wealthy seek more space as working from home becomes the new norm." Supercars might therefore become more common outside of London as a result of changes in lifestyle.

5
The text says: "Ferrari sold its entire production run of a new Monza £1m-plus supercar before it had even begun making the vehicles." One model of car that was particularly in demand was therefore £1m-plus.

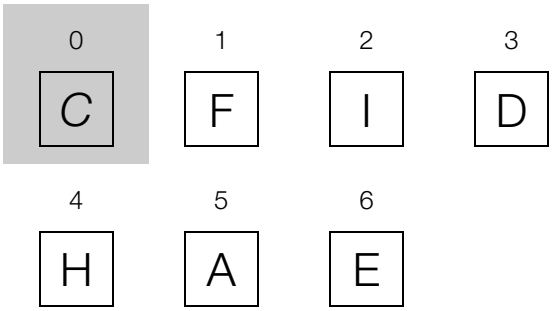

6
The text says: "Luxury car producers are also cashing in on the expensive taste for personalising vehicles, with upgrades including televisions, champagne fridges and even paint mixed with crushed diamonds." A manufacturer can therefore use paint with crushed diamonds to create a special effect on the exterior of a supercar.

7
The text says: "'The council said it introduced the technology after receiving dozens of complaints that some of its streets were becoming a 'magnet for Lamborghinis and Ferraris'." The neighbourhood of Kensington and Chelsea therefore has a magnetic effect on two particular makes of car.

8
The text says: "More than 100 people were issued with warnings in only two weeks after the introduction of the first noise cameras brought in to tackle antisocial supercar drivers." The author therefore describes drivers that the authorities have taken measures to target as antisocial.

Externships

Begründungen

0
The paragraph is about the idea that industries of the future will need workers with certain abilities. The text says: “And workers will need resilience and grit, because failure, more often than not, is part of the innovation process.”

1
The paragraph is about how many secondary schools are not equipping graduates for the world of work. The text says: “With some notable exceptions, mainstream schools in most countries remain insulated from the demands of industry, which all too often means they are cut off from rapid evolution in the economy at large.”

2
The paragraph is about how several American companies are opening schools. The text says: “Udacity, the online education start-up founded by Stanford professor Sebastian Thrun, delivers certified courses in partnership with companies.”

3
The paragraph is about how several American companies are opening schools. The text says: “According to *The Economist*, more than 70 companies, including Microsoft, Verizon, and Lockheed Martin – all struggling to find innovative and tech-savvy skilled employees – are working on similar models with schools.”

4
The paragraph is about the problems of internships from the company point of view. The text says: “Opportunities for placing young interns are rare, because they lack the skills and knowledge companies want. And companies are reluctant to have teenagers in their offices.”

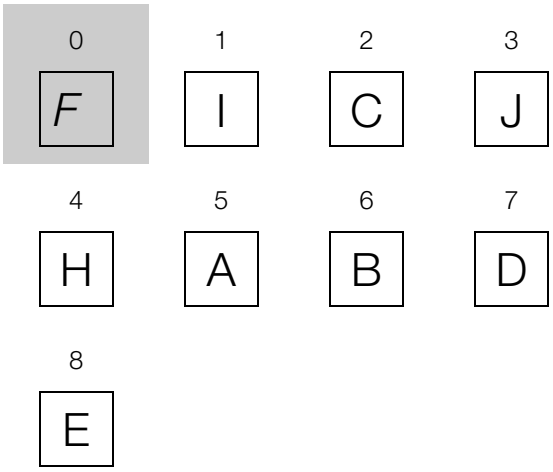

5
The paragraph is about the problems of internships from the students’ point of view. The text says: “Those secondary-school students who do manage to get an internship often find the experience unrewarding; instead of learning anything of value, they are often relegated to making photocopies and performing other manual tasks.”

6
The paragraph is about the benefits of externships. The text says: “Examples include tackling innovation challenges related to delivering services in different markets, developing technology apps to optimize operations and cut costs, and producing prototypes for new products.”

Textquelle: Khanna, Ayesha: The case for externships.
https://www.newtimes.co.rw/article/123802/Opinions/the-case-for-externships [21.03.2023] (adaptiert).

In praise of quinoa

Begründungen

0
The paragraph is about statements people have made on unusual eating habits. The text says: "PEOPLE are funny about food. Throughout history they have mocked others for eating strange things. In 1755 Samuel Johnson's dictionary defined oats as 'a grain, which in England is generally given to horses, but in Scotland supports the people'. Nineteenth-century Japanese nationalists dismissed Western culture as *bata kusa*i, or 'stinking of butter'."

1
The paragraph gives specific examples of stereotypes. The text says: "Unkind people today deride Brits as 'limeys', Mexicans as 'beaners' and French people as 'frogs'. And food-related insults often have a political tinge. George Orwell complained that socialism was unpopular […]."

2
The paragraph is about opposing attitudes towards quinoa. The text says: "This South American grain gets a particularly bad rap. To its fans, it is a superfood. To its detractors, it is like the erotic sci-fi murals found in Saddam Hussein's palaces—pretentious and tasteless."

3
The paragraph is about the difference between a Big Mac and quinoa in an advertisement. The text says: "'Foodies and gastronauts kindly avert your eyes. You can't get juiciness like this from soy or quinoa,' it said, adding that 'while [a Big Mac] is massive, its ego is not.' Even those who love quinoa sometimes fret that scarfing it may not be ethical. What if rising hipster demand pushes the price up, forcing Andeans to eat less of their beloved grain?"

4
The paragraph is about the growing popularity of eating food grown in developing countries. The text says: "This newspaper takes no view as to whether quinoa tastes nice. But its spread is a symptom of a happy trend. More and more people are chomping unfamiliar grains."

Textquelle: Autor/in nicht genannt: In praise of quinoa.
https://www.economist.com/news/leaders/21718516-spread-exotic-grains-evidence-globalisation-works-praise-quinoa [21.03.2023] (adaptiert).

5
The paragraph gives specific examples of grains. The text says: “Rich Westerners are eating less wheat and more of the cereals that people in poor countries traditionally grow, such as millet, sorghum, teff and yes, quinoa. Middle-class Asians are eating more wheat, in the form of noodles or bread, instead of rice. West Africans are eating 25% more rice per head than in 2006; millet consumption has fallen by the same share.”

6
The paragraph is about the influence of foreign cultures. The text says: “Migration and tourism have broadened people’s culinary horizons: Chinese visitors to France return home craving baguettes; Americans who live near Ethiopian immigrants learn to love *injera* […].”

7
The paragraph is about global improvements regarding hunger. The text says: “The globalisation and modernisation of agriculture have contributed to a stunning reduction in hunger. Between 1990 and 2015, the proportion of children under five who were malnourished fell from 25% to 14%. People who are still underfed are less severely so […].”

8
The sentence is about better living conditions for quinoa farmers. The text says: “And between 1990 and 2012 the proportion of their income that poor people worldwide had to spend on food fell from 79% to 54%. As for those quinoa farmers, don’t worry. A study by Marc Bellemare of the University of Minnesota found that Peruvian households became better-off because of the quinoa boom, […].”

Health effects of veganism

0	1	2	3	4	5	6	7
B	D	D	C	B	A	A	C

Begründungen

0
The text says: "Some have even gone so far as to say that meat made us human." Some researchers therefore claim that, for humans, eating animal products is an essential part of evolution.

1
The text says: "One reason is that intelligence is expensive – the brain devours about 20% of our daily calories, though it accounts for just 2% of our body weight – and what better way to find the enormous array of fats, amino acids, vitamins and minerals these fastidious organs require, than by feasting on animals which have already painstakingly collected or made them." People's diet could therefore affect their mental capacity because thinking uses a comparatively high amount of energy.

2
The text says: "Meanwhile in India, meat-free diets have been mainstream since the 6th Century BCE." In one part of Asia, being a vegetarian has therefore been widespread for a long time.

3
The text says: "On the one hand, recent concern about the nutritional gaps in plant-based diets has led to a number of alarming headlines, including a warning that they can stunt brain development and cause irreversible damage to a person's nervous system." Worries about vegan malnutrition therefore caused sensational media coverage.

4
The text says: "Back in 2016, the German Society for Nutrition went so far as to categorically state that – for children, pregnant or nursing women, and adolescents – vegan diets are not recommended, which has been backed up by a 2018 review of the research." Official nutritional guidelines in Germany were therefore confirmed by a later scientific study.

5
The text says: "After the Royal Academy of Medicine in Belgium decided a vegan diet was 'unsuitable' for children, parents who force a vegan diet on their offspring in Belgium could even one day find themselves in prison." In the future, families who only feed their children plant-based products could therefore be breaking the law in a European country.

6
The text says: "It was conducted on 555 Kenyan schoolchildren, who were fed one of three different types of soup – one with meat, one with milk, and one with oil – or no soup at all, as a snack over seven school terms." The pupils analysed in one study were therefore put into four groups.

7
The text says: "Along with the children who received soup with added oil, they also did the best on a test of arithmetic ability." Concerning maths skills, a Kenyan study therefore showed that the effect of meat is similar to another ingredient.

Textquelle: Gorvett, Zaria: How a vegan diet could affect your intelligence. https://www.bbc.com/future/article/20200127-how-a-vegan-diet-could-affect-your-intelligence [21.03.2023] (adaptiert).

Begründungen

0
The text says: "His physicians had prepared herbal and alchemical elixirs, but none could stave off his decline." His physicians therefore failed to produce a substance that would save the Emperor's life.

1
The text says: "So Qin Shi Huangdi, the First Emperor of a unified China in the third century BC, had begun preparations for the next best thing to an endless life on Earth. He would continue his cosmic rule from the spirit world, and his underground tomb would be a palace for the afterlife, complete with its own army of life-size clay soldiers." The future function the emperor's tomb would serve for him is therefore a palace for the afterlife.

2
The text says: "Those terracotta warriors lay hidden for two thousand years beneath several metres of sandy soil a mile from the First Emperor's burial mound at Mount Li, to the northeast of the city of Xi'an in Shaanxi province of north-central China. They were rediscovered in 1974 by farmers digging a well, and Chinese archaeologists were astonished to find over the next decade that there were at least 8000 of them, once brightly painted and equipped with clay horses and wooden chariots." The terracotta warriors had therefore been given clay horses or wooden chariots.

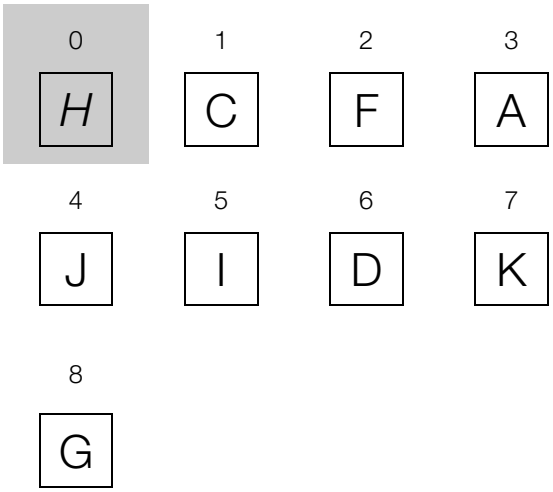

3
The text says: "No one knows what other wonders the mausoleum might house, for the main burial chamber – a football-pitch-sized hall beneath a great mound of earth – remains sealed." The most important part of the tomb is therefore football-pitch-sized.

4
The text says: "This idea that the main chamber contains a kind of microcosm of all of China (as it was then recognised) with rivers, lakes and seas of shimmering mercury had long seemed too fantastic for modern historians to grant it credence." China was therefore believed to be recreated as a whole in the most important part of the tomb.

5
The text says: "In the 1980s, Chinese researchers found that the soil in the burial mound above the tomb contains mercury concentrations way above those elsewhere in the vicinity." Scientists therefore discovered in the area around the tomb unusually high mercury concentrations.

Korrekturhinweise

A case of advanced renewable energy

Begründungen

0
The paragraph is about a new kind of solar power plant. The text says: “But the engineers and financiers behind the facility, located in the desert about halfway between Las Vegas and Reno, say the power plant’s promise is anything but fiction.”

1
This paragraph is about the potential of this new technology to replace conventional methods. The text says: “‘This is the first utility-scale facility in the world with this technology,’ says SolarReserve CEO Kevin Smith. ‘Our technology can truly replace conventional generation.’”

2
This paragraph is about how conventional solar power plants work. The text says: “Most solar power plants, which use photovoltaic technology, capture energy through the solar panels themselves, converting the sun’s light straight to electricity and then routing it into the grid for immediate use.”

3
This paragraph is about how this new technology avoids the problems of conventional solar power. The text says: “The Crescent Dunes plant, and others in the class known as concentrated solar, does not have that problem.”

4
This paragraph is about how the new concentrated solar technology works. The text says: “Salt is capable of retaining very high levels of heat, turning it into a kind of thermal battery.”

5
This paragraph is about the future of concentrated solar plants. The text says: “States like California and New York have both committed to getting 50% of their power from renewable sources in the coming decades – a change that would be difficult to accomplish without some form of clean energy storage.”

6
This sentence is about the cost-efficiency of concentrated solar technology. The text says: “Just how much the concentrated solar market will grow in the coming years will depend primarily on the cost of deploying the technology.”

Textquelle: Worland, Justin und Josh Raab: This solar power plant can run all night. http://time.com/4291347/crescent-dunes-solar-power-plant/ [21.03.2023] (adaptiert).

7

This sentence is about how the costs could be lowered. The text says: “The method of collecting and storing energy is relatively new and expensive, but widespread deployment could reduce the costs to make it competitive, says Professor Jay Apt of the Carnegie Mellon Electricity Industry Center.”

8

This paragraph is about how the energy can be stored. The text says: “Even with significant cost reductions, concentrated solar will need to face off against advances in battery technology that could make it easier to store power in electrical form – increasing the desirability of other renewable sources like photovoltaic and wind power.”

0
The text says: "Ed's boy swung round and leaned forward, his arm following a wavelike motion the bird soaring above the water at Cannop Ponds in the Forest of Dean. We leaned with him, scanning the sky." The family therefore did not hesitate to pay attention to what the guide's son was showing them.

1
The text says: "Ed, a passionate zoologist, was taking us on an 'animal safari', offered to guests staying at the Tudor Farmhouse in the heart of the Forest of Dean." The tour the family took is therefore not available to everyone in the area.

2
The text says: "We'd arrived the afternoon before and thanks to the hotel's map of wild swimming spots, headed straight out to the River Usk, half an hour away, sinking into the water from a tiny island beach in the centre of a bend in the river." Online research therefore did not help the family access the surrounding area.

3
The text says: "I was impressed by the variety on the menu, particularly for someone like me who is gluten- and dairy-free, and by the fact that much of it was locally sourced – and tucked into delicately flavoured beetroot and cured salmon, followed by pork belly with roast onion." The author therefore liked where the products at the Tudor Farmhouse came from.

4
The text says: "We ambled up paths and across bridges, trying to spot the precise locations for scenes from *Star Wars* and *Doctor Who*, both of which were filmed here." The family therefore went on a walk looking for places relevant in popular culture.

Textquelle: Edgley, Kate: We're going on a boar hunt: into the Forest of Dean. https://www.theguardian.com/travel/2019/sep/15/we-are-going-on-a-boar-hunt-forest-of-dean [21.03.2023] (adaptiert).

5
The text says: "What we were itching to see were wild boars, the pigs which were once native here, before being hunted to extinction." The family's top priority was therefore not to go bird-watching.

6
The text says: "As prolific breeders with no natural predators, the boars quickly multiplied and today there are an impressive 1,500 of them." One animal species therefore swiftly re-established itself in the area.

7
The text says: "Deep into the forest Ed led us, encouraging us to inhale the hop-like scent of flowering horse chestnuts and the freshness of wild mint, as the words and rhythm of Michael Rosen's *We're Going on a Bear Hunt* played in my head." The tour therefore does not concentrate on encounters with animals only.

8
The text says: "We stood still, peering into the trees, slightly scared by the prospect of the untamed beasts we could hear, but wanting to see them, too." The noises in the forest therefore caused the family to have mixed feelings.
